

PROFESSIONAL COMMUNICATION

Why I did?

I joined this program because I wanted to improve the way I communicate in school, group projects, and future professional spaces. I also wanted to feel more confident while speaking, reduce hesitation, and learn how to express my ideas clearly.

How does this make my communication effective?

This program helped me communicate more effectively by improving my clarity, confidence, and ability to express ideas thoughtfully. It trained me to listen actively, organize my thoughts, and respond with purpose in both academic and collaborative settings.

What I did?

I completed a 2-week online certificate program focused on improving professional communication skills. The course included lessons on verbal and non-verbal communication, active listening, giving clear instructions, writing effective emails, and presenting confidently.

This experience helps in my career enhancement by strengthening my communication skills, which are essential for teamwork, leadership, presentations, and professional interactions. It improves my confidence in expressing ideas clearly, listening actively, and responding effectively—skills that are highly valued in academic settings, interviews, and future workplace environments.

Through this experience, I developed from being hesitant and unsure in communication to becoming more confident, clear, and purposeful in expressing my thoughts. I learned to listen actively, structure my ideas better, and communicate with awareness, which strengthened both my academic and interpersonal interactions.

How does this help in my career enhancement?

What is the character development in this?

What I learnt?

Through this experience, I learned how to communicate more clearly and confidently by choosing the right words, organizing my thoughts, and expressing my ideas without hesitation. I also learned the importance of active listening, tone, and clarity in making communication more effective in both academic and real-life situations.

Who are you?

14 comments

Now that you've started to identify your communication style, it's time to ask a more prominent question: who are you?

You might answer this question with your name and occupation. Your current status (whether it be your profession or role in your personal life) plays a huge part in how you choose to identify yourself.
